Professional Summary

Software developer with 12 years of experience in the development of full stack applications. Excels in every stage of the life cycle of software development, including design creation, coding, debugging, testing, and maintenance. Expert in devising innovative and tailored solutions to assist businesses to achieve their goals in a variety of industries. Advanced skills and knowledge of leading programming tools with a strong background in mathematics, algorithms, and data-processing logic.

Professional Experience

Interswitch POS SDK Wrapper - github.com/chimake/interswitchSDKWrapper

React Native Developer - Personal Project

September 2025 - Present

- ▶ Developed a React Native wrapper around Interswitch's Java POS SDK for seamless mobile payment integration.
- ▶ Created native bridge modules to interface between React Native and the Java SDK components.
- ▶ Implemented comprehensive payment processing features including card transactions, receipts, and transaction management.
- ▶ Ensured compatibility across Android devices while maintaining security standards for financial transactions.
- ▶ Provided a simplified JavaScript API for developers to integrate POS functionality into React Native applications.

Suwk (EdTech App – Vocational Study Platform)

March 2025 – September 2025

Mobile Developer (React Native) — Remote

- ▶ Led the development of the Suwk mobile application using React Native, ensuring a smooth cross-platform experience on Android and iOS.
- ▶ Integrated course modules, video lessons, quizzes, and progress tracking features for learners.
- ▶ Worked closely with backend developers to consume RESTful APIs for user authentication, course content, and assessment scoring.

- ▶ Implemented offline access features to allow learners to download and continue learning without internet connectivity.
- ▶ Ensured seamless navigation, responsive UI, and accessibility compliance across devices.
- ▶ Conducted performance profiling and optimization, reducing app load time by over 30%.

MealFam - staging.mealfam.com

January 2025 - July 2025

Fullstack Developer - Contract

- ▶ Developed Meal Fam, a luxury ready-to-eat meal delivery service with a tiered subscription system (Silver, Gold, Diamond).
- ▶ Built the backend with Laravel and implemented the frontend using Blade and Bootstrap, ensuring a responsive and seamless user experience.
- ▶ Engineered a curated weekly menu system, allowing personalized meal recommendations for users.
- ▶ Developed an admin dashboard for managing subscriptions, orders, and customer interactions.
- ▶ Integrated a secure payment system for automated subscription billing and order processing.
- ▶ Implemented a referral system, allowing users to invite friends and earn credits for free meals.
- ▶ Built a real-time notification system to keep users updated on orders, promotions, and referrals.
- ▶ Ensured mobile responsiveness and performance optimization for smooth functionality across devices.
- ▶ Configured and optimized GCP servers for hosting the Meal Fam platform, ensuring security, scalability, and high availability.
- ▶ Set up Apache, database management (MySQL), and SSL certificates to secure the platform.

- ▶ Managed deployment and continuous integration (CI/CD) for seamless updates and feature rollouts.

Egghead Softwares

June 2022 – Nov 2022

Fullstack Developer

- ▶ Maintained existing WordPress websites for corporate clients across Africa.
- ▶ Optimized website performance including loading speed to maintain customer satisfaction levels.
- ▶ Built and maintained custom E-commerce web applications with WooCommerce on WordPress.

Society Of Igbo Professionals - societyofigboprofessionals.org

April 2021 – June 2022

Web Developer

- ▶ Maintained existing WordPress website for the professional network.
- ▶ Optimized website performance including loading speed to maintain customer satisfaction levels.
- ▶ Built and maintained custom social community web application with BuddyPress on WordPress.

+Life - web.pluslife.app

December 2019 – June 2020

Software Developer

- ▶ Built a custom ad server on PHP (CodeIgniter) for the messaging platform.

- ▶ Developed a web chat platform using Firebase and Laravel.
- ▶ Implemented ad serving functionality on both web and mobile chat applications.
- ▶ Assigned tasks to junior developers and provided technical guidance.
- ▶ Reviewed and refactored junior developer codebase for quality assurance.
- ▶ Mentored junior developers in best practices and development methodologies.

Talentbase Nigeria - talentbase.ng

June 2018 – October 2018

Backend Developer

- ▶ Built backend development for Lagos State pensions application.
- ▶ Wrote comprehensive unit test cases for quality assurance.

G.U.O Transport Company - guotransport.com

February 2014 – June 2018

IT Administrator

- ▶ Handled daily system maintenance and Windows server administration.
- ▶ Got promoted to the role of web developer.
- ▶ Built a comprehensive web-based ticketing application.
- ▶ Deployed the ticketing application to terminals nationwide.
- ▶ Developed a bus booking application for customer convenience.

Education

Cloud Native Computing Foundation (CNCF)

Kubernetes and Cloud Native Associate (KCNA)

2025

Microverse

Fullstack Developer

San Francisco, California, United States • January 2022 - October 2022

St. Monica Secondary School

SSCE

Lagos, Nigeria • June 2007 - June 2012

Technical Skills

Programming Languages

PHP, JavaScript, Python, SQL

Frontend Technologies

React, React Native, Vue.js, jQuery,
CSS, Bootstrap

Backend Technologies

Laravel, CodeIgniter, Firebase,
Node.js

Databases

MySQL, MongoDB, PostgreSQL

Cloud & DevOps

Google Cloud Platform, Apache,
CI/CD, Server Administration

Methodologies

Agile Development, Solutions
Architecture, Project Management
